Infosys Representative

Infosys

To whom it may concern,

I am a current student at the New Apprenticeship Bootcamp. I am writing to apply for the Tech Support Associate position at your company. I am highly interested in the IT field and have previous experience and knowledge that I believe could be useful to this position.

Infosys' growth and its many achievements are of great interest and inspiration to me. From its establishment in 1981 to this day, the company has not stopped expanding and pushing businesses into the digital era. This unyielding drive for continuous growth is a major reason for me to wish to offer my skills in the ServiceNow platform, as well as coding in HTML, CSS, and JavaScript. I am also a fast learner and a detail-oriented individual with a knack for organization. I am excited at the prospect of becoming an asset to your company and helping it grow even further by giving more than I get.

Thank you for taking the time to read this letter and I look forward to the opportunity of speaking with you about my interest in this position.

Sincerely,

Israel Elena
